IDENTIFICATION

The subjects did not identify themselves when challenged and did not present at the station gate. Identity was established on Day 215 by Registry match against the licence numbers above, recovered from Subject A's bag. Both subjects were found to be the subjects of active Bureau notices.

Under the prevailing conditions of darkness, distance and non-compliance, personnel could not reasonably have identified the subjects prior to engagement. The subjects had entered a restricted site, at night, without authorisation.

SUPERVISOR'S NARRATIVE

At the 2nd Hour of the Third Watch, perimeter personnel observed two (2) individuals approaching the protected formations of Survey Sector T on foot from the north-east. The individuals did not present at the station gate and did not announce themselves. Upon the individuals crossing the inner perimeter marker, personnel initiated Escalation Protocol 4 (Inner Perimeter, Non-Responsive Subjects) and issued clear verbal commands. The individuals did not comply. Subject A made a sudden movement toward the line of personnel and reached toward his bag, and an object consistent with a weapon was observed in Subject B's hand. Personnel discharged service weapons in accordance with protocol. Discharge ceased on the order of the senior warden on post once the threat was resolved.

Personnel responded promptly, in concert and with discipline. The volume of discharge is consistent with four (4) personnel engaging simultaneously under low-light conditions and does not indicate any departure from training. The object in Subject B's hand was recovered and logged (Item 01).

The subjects had entered a restricted site, at night, without authorisation, and were the subjects of active Bureau notices. The Supervisor notes that this is the first perimeter engagement in the station's history, and that personnel performed as trained.

REMARKS OF THE REVIEWING AUTHORITY

The finding is held for review.

This station was built on my authority, funded on my authority and armed on my authority. It has failed that purpose in the worst way possible.

She was to be brought home.
